Diagnostic Medical Sonography, Practical Nursing and Surgical Technology

Prerequisites for Surgical Technology, Practical Nursing and Diagnostic Medical Sonography:

- High school diploma or equivalent plus satisfactory score on the Pre-Entrance Exam.
- Sonography students must also have college credits as specified below.

NOTE: Financial aid available to those who qualify.

Diagnostic Medical Sonography

Learn the fascinating field of sonography including OB/GYN, abdomen vascular, echo, and breast ultrasound. This 24-month program integrates basic sciences, medical sciences and instruction in Diagnostic Sonography with supervised clinical experience in hospitals and doctor's offices from Manhattan to Southampton. Students gain valuable hands-on experience in several three-month clinical rotations. Successful completion of the program leads to a certificate that qualifies you to sit for any of the five registry examinations in Diagnostic Medical Sonography 60 days prior to graduation. Accredited by the Commission of Accreditation of Allied Health Education Programs (www.caahep.org; 1361 Park St., Clearwater, FL 33756; 727/210-2350) upon the recommendation of the Joint Review Committee on Education in Diagnostic Medical Sonography.

Prerequisites: high school diploma or equivalent; a minimum grade of C in college-level, credit-bearing courses in General Physics, Anatomy & Physiology I & II, Algebra, and English; and a satisfactory score on Pre-Entrance Exam. Graduates from other health programs are welcome to apply. Courses begin in July and have vacation during holiday periods.

Additional costs of approximately \$1,700 for textbooks and uniforms. Financial aid is available to those who qualify.

17ASON501A \$40,999* 7/13/16-6/30/18

NPT/202A

M-F 8AM–6PM 2800hrs, 491 sessions

Practical Nursing

Learn the skills and knowledge necessary to be a valuable member of today's health care team. The School of Practical Nursing, located at Tech's Northport campus, helps prepare you for licensing as a practical nurse. The program is approved by the NYS Education Department. The low ratio of students to faculty allows many opportunities for individualized instruction.

For those planning to pursue additional training, Tech is affiliated with registered nursing programs at Helene Fuld College of Nursing, Nassau Community College, Suffolk Community College, SUNY Farmingdale and Molloy College. Advanced placement is available in the Surgical Technology Program within one year of graduation.

Tuition includes stethoscope and surgical scissors. Additional costs for textbooks, uniforms, licensing fee, physical exam, liability insurance and CPR certification are required for entering program. Financial aid available to those who qualify. Prerequisites: high school diploma or equivalent plus satisfactory score on Pre-Entrance Exam. HEGIS code 5209.20

Surgical Technology

Learn to work closely with surgeons, anesthesiologists and registered nurses to provide patient care throughout surgery. Study setting up the operating room, prepping patients, the disease process and instrumentation. You will be assigned to a local health care facility to work under an experienced health care professional. This program helps prepare you for employment in operating rooms, surgical offices, delivery rooms, emergency departments, physician and dentist offices, central supply services, cardiac catheterization clinics, tissue banks and ambulatory surgical care sites. Advanced placement is available in the Practical Nursing program within one year of graduation. Accredited by the

Commission on Accreditation of Allied Health Education Programs (www.caahep.org; 1361 Park St., Clearwater, FL 33756; 727/210-2350) upon the recommendation of the Accreditation Review Council on Education in Surgical Technology and Surgical Assisting. Additional costs for textbooks, malpractice insurance, uniform, physical exam, and CPR certification are required for entering program. Financial aid available to those who qualify. Prerequisites: high school diploma or equivalent plus satisfactory score on Pre-Entrance Exam.

Brochures with application procedures, program requirements and information on pre-entrance exams are at www.wsbores.org/fulltime or call (631) 261-3721, x219.

Prepare Now for the Pre-Entrance Exam!

All applicants to the Diagnostic Medical Sonography, Practical Nursing, and Surgical Technology programs must achieve a satisfactory score on the Pre-Entrance Exam (also known as Test for Academic Skills) and have a high school diploma or equivalent. These three programs have substantial class work and homework that require students to be proficient readers with a wide vocabulary and competent math problem solvers.

BOCES highly recommends that students take the Prep Class for Pre-Entrance Exams, however, those who have completed a recent academic program with strong grades may consider proceeding directly to the Pre-Entrance Exam. Most students find that the Prep Class for the Pre-Entrance Exam helps them prepare for the rigorous Pre-Entrance Exam, gain self-confidence, and solidify their interest in pursuing the academic work necessary to succeed in these programs.

Note: A successful score on the Pre-Entrance Exam is the first step in applying to these three programs but does not guarantee admission.

Prep Class for Pre-Entrance Exams:

Practical Nursing, Surgical Technology & Diagnostic Medical Sonography

BOCES statistics indicate that the passing rate on the Pre-Entrance Exam is higher for those who complete this Prep Class.

To enter these three programs, you must satisfactorily pass the Pre-Entrance Exam. Take this Prep Course to help you prepare for your Pre-Entrance Exam. Work on your reading comprehension, basic math skills, and critical thinking. Textbook additional (www.wilsontech.org/bookstore). Class meets 50 hrs, 10 sessions.

HEALTH

Central Sterile Processing Technician

Looking for a skilled, entry-level position in health care where you will have responsibility for a variety of vital services in health facilities? A certified Central Sterile Processing Technician processes and sterilizes surgical instruments in hospitals, surgical centers and other health facilities.

The coursework incorporates classroom and laboratory learning activities and resources and will include a 250 hour clinical internship. Upon successful completion, students will be eligible to take the IAHCSPM certification examination for Certified Central Service Technician. Prerequisites: high school diploma or equivalent, personal interview, physical exam and successful score on TABE Test (see below). Additional costs: uniform (approximately \$100) and certification exam, \$105. Textbook additional.

Coming Fall 2016

\$6,500 650hrs, 63 sessions

EKG / Monitor Technician

Satisfactory completion of this course will help prepare you to work as an entry level EKG or monitor technician in hospitals, clinics, health related facilities and physicians offices. Learn to identify normal and pathologic heart rhythms and collect diagnostic quality recordings of the heart's electrical and mechanical activity. You will also learn to monitor a patient's cardiac function in a critical care or emergency room setting. Gain the knowledge and skills to assist doctors and nurses by recognizing and reporting changes in a patient's heart function. The curriculum includes cardiac anatomy and physiology, 12 lead and rhythm strip analysis lead placement and 12 lead EKG. Rhythm strip practice will enhance learning and clinical skills. Don't miss the chance to be in the forefront of critical and emergency medicine! You must earn a final grade of 90% to receive a certificate of completion. Testing fee separate. High School Diploma or equivalent is required to sit for the NCCT exam.

Textbook additional (www.wilsontech.org/bookstore). Students are required to purchase

Certificate

review books and practice exams available by contacting NCCT Customer Service at 1-800-875-4404 or www.ncctinc.com (Approx \$40). NCCT Test: June 22, 2016

Medical Assisting

Prepare to work in physicians' offices, hospitals and clinics. Duties include running the front office, receptionist functions, bookkeeping, and filing. Assist the physician with examinations and treatments, medications; perform EKGs and simple laboratory procedures. Study topics including hematology, urinalysis, phlebotomy, basic blood banking, and routinely performed chemistry tests. Clinical internship will be provided in local medical offices and clinics. Those who successfully complete this program are eligible to sit for two national certification exams-Medical Assisting and Phlebotomy. Testing fees separate. Prerequisites: basic computer skills and successful score on TABE Test (see below). Additional costs (approx. \$550) for uniform, physical exam and textbooks (www.wilsontech.org/bookstore) Note: High School diploma or equivalent is required to sit for American Medical Technologists (AMT) certification exams (\$100). Financial Aid is available to those who qualify.

Pharmacy Technician

Prepare for a fast growing health career where you work alongside a licensed pharmacist and other medical personnel. A pharmacy technician provides essential services for patients and the general public. Learn pharmacology and the technical skills to assist the pharmacist in screening and filling prescriptions, preparing medicated solutions, calculating dosages, collecting payment and initiating billing, selecting and purchasing pharmaceutical supplies, managing inventory control, and assisting patients in the use of prescribed medications. Professional communication, safety and medical ethics will be stressed. Successful completion of this course will help prepare you to seek employment in a variety of settings including hospitals, clinics and retail pharmacies. To pass this course you must achieve a final grade of at least 90%. Strong math skills and knowledge of algebra required. Prerequisite: successful score on TABE Test (see pg 4) U.S. high school diploma or equivalent required for the certification exam. Payment plan available. 90% attendance required. Testing fee separate. Textbook additional (www.wilsontech.org/bookstore).

Physical Therapy Aide

Help patients recover from injuries, improve their mobility, resume work and enjoy life again. Gain the knowledge and skills to assist medical professionals and therapists in offices clinics, hospitals, and long-term care facilities. Learn how to set up and

Build Your Foundation for a Career in Health Care**Anatomy and Physiology for Health Careers**

The study of the human body and its systems is the first course in any Health Careers program. Careers in nursing, physical therapy, surgical technology, medical assisting, sports rehabilitation and personal training are a few careers that require a solid understanding of the human body. College level Anatomy and Physiology encompasses a vast body of knowledge causing many students to be overwhelmed and easily discouraged. This course offers an introduction to the human body, provides an understanding of body systems and lays the foundation for more detailed anatomy courses. This course is strongly recommended for anyone who is considering applying to a health career program. Textbook additional (www.wilsontech.org/bookstore).

16SMED114A \$299 2/8–3/16 NPT/202A M&W 6–10PM 40hrs, 10 sessions

Math for Health Careers

If you are considering any career in health care, this course is a must because good math skills are essential for calculating medication dosages. Move from addition, subtraction, division, and multiplication to fractions, ratios, and proportions. Learn the systems used in measuring doses of medication and then learn to solve common dosage problems and complete temperature conversions. Practice using military time, a medical standard.

Medical Office Coding & Billing Specialist

Certification

Learn to manage all aspects of the administration of a busy medical office and improve your job skills as a medical executive assistant. After successfully completing all seven modules, you are eligible to take the National Center for Competency Testing (NCCT) exam for certification as an Insurance and Coding Specialist. Prerequisite: High School Diploma or GED plus competence in keyboarding. (See page 17 for a listing of our basic computer courses) and a successful score on TABE test. (pg 4) NOTE: Must complete Modules I-VII with a passing grade to sit for NCCT Certification exam, fee separate (\$90).

Tuition is for all seven modules. Complete the day program in 4 months. Additional costs for textbooks (www.wilsontech.org/bookstore) as well as review books and practice exams (NCCT Customer Service at 1-800-875-4404 or www.ncctinc.com). (Approx. \$40)

Module I: Medical Terminology I

Learn the meaning and pronunciation of commonly used medical terms and abbreviations. Building a strong medical vocabulary will enhance your success in the health field as well as increase your understanding of medical information. (40 hrs)

Module II: Medical Terminology II

Learn the terminology associated with the structure and function of the skin, musculoskeletal, cardiovascular, respiratory, digestive, endocrine, urinary, reproductive and nervous systems. Discuss common diseases, diagnostic procedures and laboratory testing. (40 hrs)

Module III: Law and Ethics

Learn the professional responsibilities of members of the health care team and examine doctor-patient relationship. Discuss Patient Bill of Rights, HIPAA guidelines, licensing of health care providers, malpractice, health care proxy, consent policies and procedures, and legal responsibilities of the executive medical assistant. (21hrs)

Module IV: Administrative Office Procedures

Actual case scenarios will help you become well-versed in front desk reception, communication and listening skills, telephone techniques, medical records and appointment management. Covers

patients' medical records, ledger cards, ICD and CPT coding, insurance claims and management of medical office's financial activity. (40 hrs)

Module V: Medical Coding

An introduction to basic guidelines in using the ICD-10 and CPT coding manuals. Learn methods specific for medical offices, and the billing of Medicare and private insurance. Explore appropriate use of modifiers. (80 hrs)

Module VI: Electronic Medical/Health Records

Gain the skills needed to be a part of the U.S. healthcare system's transition to electronic medical records. In this course you will get practical experience to help you understand and become comfortable with computerized medical records used in the clinical setting. (40 hrs)

Module VII: Electronic Billing

Learn to access information to complete and transmit insurance forms electronically. Learn to use ICD-10 and CPT Coding. You will receive individualized instruction to develop your billing skills in our computer laboratory. (50 hrs)

Become a Recovery Coach! **NEW**

Prepare to work in the addiction and mental health field as a Recovery Coach who helps people along the path of recovery—either before, during, after or instead of treatment. Work in your own practice or in facilities such as community outreach centers, detox facilities, residential centers and hospitals. Recovery Coaches do not provide clinical help or dispense medication; instead they work with the recoveree, either as a solo coach or as part of a team. Learn to help patients engage with treatment and help them develop the various skills needed for recovery.

This class fulfills the 60 hour educational requirements set forth by NYS and the Office of Alcoholism and Substance Abuse Services (OASAS) to become a NY-certified Recovery Addictions Recovery Coach or NY-certified Addiction Recovery Advocate. Class includes extensive preparation for the certification exam. Instructor will provide information pertaining to exam testing locations and the application process. Class has four modules:

Module I-Recovery Coach Academy (30hrs)

Module II-NYS Ethics (12hrs)

Module III-Medically Assisted Treatment (6hrs)

Module IV-Spirituality (12hrs)

Upon successful completion of each module you will receive a Healthspan.US certificate as well as information to receive your CCAR Certificate (Connecticut Community for Addiction Recovery) which you will need to file your NYS application.

Curriculum includes the role of recovery coaches in the recovery process, core values and guiding principles of recovery, the many dimensions of recovery and recovery coaching, the stages of recovery, wellness planning, ethics and guidelines for making ethical decisions, as well as spirituality and what this means to each individual as it pertains to recovery. The course covers the history, concepts and varieties of Medically Assisted Treatment (MAT) that may be used during recovery pathways that include a medication component. No prerequisites.

Additional fees for:

- Manuals and materials (\$139 due on first night of class. Bring money order only made out to HealthSpan.US)
- Application fee for certification exam (\$100)
- NYS Recovery Coach Certification Exam (\$125 will be paid to NYS when application is submitted)

Prepare for ASE Certification Automotive Technician Training

Automotive Technician Training

Vehicles are far more sophisticated today than in previous decades and require technicians with more advanced technical training and computer skills. Wilson Tech, accredited by the National Automotive Technicians Education Foundation (NATEF), is equipped to teach you the skills that will help you advance in this field. Upon successful completion you will be prepared to sit for the corresponding certification exams which stress knowledge of job-related skills and lead to Automotive Service Excellence (ASE) certification.

Learn the theory and skills to diagnose, service and repair cars, SUV's and light duty trucks. You will use up-to-date electronic and hydraulic equipment to precisely diagnose today's sophisticated vehicle. Prerequisite: High School diploma or equivalent and satisfactory score on a TABE exam and interview. Students must also attend a 4-hour safety orientation workshop. Textbooks included. New students may begin on the first day of most modules.

- *Electrical/Electronic systems (260 hrs)
- *Automatic Transmission & Transaxle (137 hrs)
- *Engine Performance (234 hrs)
- *Engine Repair (195 hrs)
- *Suspension and Steering Systems (195 hrs)
- *Heating & Air Conditioning (156 hrs)
- *Brakes (163 hrs)
- *Manual Drive Train & Axles (137 hrs)

Call (631) 261-3863 for a pre-entrance interview appointment and for more information about the pre-entrance requirements. Financial help is available to those who qualify.

16AAUT500A \$15,449 NPT/Auto M-F 8AM-3PM 1477hrs

New students may begin on the first day of most modules.

Some classes and programs at Wilson Tech may qualify for funding through the GI Bill®. Call our Veterans' advisor at (631)-667-6000 x353 for the list of specific classes that are approved.

Program approved by the Federal Aviation Administration

FAA Airframe & Powerplant Certificates

- Central location at Republic Airport in Farmingdale
- Approved for ACCES-VR, VA
- FAA-certified instructors
- Financial aid/payment plans available to those who qualify.
- DD214 Waivers are evaluated onsite for approved military training

Certificate Programs

Aviation Maintenance Technology

This FAA-approved program provides the hands-on experience to service, repair and overhaul reciprocating and turbine engines and components, powerplant control systems, instrumentation, and induction and exhaust systems.

To prepare for both the FAA Airframe and Powerplant licenses, students must complete five semesters (total of 1,910 hours). Call 631-752-1957 for more information and to tour the facility.

Semesters begin Sept., Jan. and May. and the program is offered at our Aviation Facility at Republic Airport in Farmingdale. Financial aid/payment plans available to those who qualify, call our Financial Aid office at 631/261-3600, x214. DD214 waivers are evaluated on-site for approved military training.

Tuition includes basic tools for each curriculum area, books, and testing for the Designated Mechanic Exam (DME). Students must supply coveralls with long sleeves and work boots to be worn in the hanger. FAA exams (3) extra: \$150 each. For those seeking just one of these FAA licenses, take General plus both sections for the license you seek. Tuition will be prorated accordingly. Before being admitted into the AMT program, prospective students must TABE (take a test of Adult Basic Education), receive a successful score and meet with administration to determine eligibility into the program.

16AAMT500A \$30,300 REP/ M-F 8AM–2:30PM 1910hrs, 224 sessions

Designated Mechanic Exams (FAA Airframe and/or Powerplant)

Prior to registering, students must be authorized to sit for the exam. For requirements, call (631) 752-1957. To schedule pre-test interview, contact the Designated Mechanic Examiner at (631) 752-1957. Testing Center is open M–Th, 8AM–6PM.

Certificate Program

Home Inspectors/Contractors/Homeowners

All courses are approved by the NYS Dept. of State.

Earn your Home Inspection License **Coming Fall 2016**

Approved by the Nat'l. Assn. of Home Inspectors, Inc. and the Nat'l. Assn. of Certified Home Inspectors. 100 hours of classroom study and 40 hours of in-field experience plus homework assignments and final exam. Background in engineering, construction, or trades is helpful but not mandatory. 140 hrs, 25 sessions

Continuing Education

Home Inspection - Building Science

Helpful for a homeowner or 'do-it-yourselfer'. Covers thermodynamics, heat transfer, moisture evaluation, indoor air quality issues, air and vapor barriers, proper construction methods, heat loss and energy saving measures. Learn the basis for the current Energy Star programs. Learn ways to insulate attics, exterior walls, basements and crawl spaces to prevent excessive heat loss and moisture. Learn about weather stripping windows and doors, lighting, and evaluating buildings for proper R-value and U-value using scientific testing methods. Discuss high efficiency heating and hot water systems as well as ventilation systems. Cover furnaces, boilers, as well as geo-thermal and other heating methods with an emphasis on saving energy for heating and cooling. Discuss cooling loads and how to inspect duct systems for air leakage.

Lead Safety Course

This course provides contractors with the 8-hour education and certification necessary for compliance with the federal directive. Developed by the Environmental Protection Agency (EPA),

in collaboration with the Department of Housing and Urban Development (HUD) for training renovation, repair and painting contractors how to work safely in housing with lead-based-paint. It complies with EPA's Renovation, Repair, and Painting (RRP) Rule, and HUD's Lead Safe Housing Rule. These .8 CEUs count as part of the biennial 24 CEU credit requirement for home inspectors. The eight modules include discussions and demonstrations on the threat of lead paint, current NYS and federal regulations, the containment of dust and personal safety precautions when working in a lead environment.

16SCON113A \$265 3/7–3/9 DH-C/27
M&W 6–10PM 8hrs, 2 sessions

Personal Safety During Inspections

Raise your awareness level of hazards, hidden and in plain sight during a typical inspection. Review electrical hazards such as the circuit breaker panel, exposed junction boxes and conductors, and wet environments. Identify potential hazards and address exposure and materials used to enhance personal safety during inspection of suspected noxious, flammable and carcinogenic gasses; lead in plumbing and house paint; asbestos, and mold. You will also learn the correct method

Certificate

Cabinetmaking - Introduction

Learn the techniques necessary to build a kitchen for yourself. Cut materials and create joinery to assemble a standard base cabinet with door and drawer and a standard wall cabinet with door. See the difference between framed and frameless cabinet construction. Develop the skills to install hinges and drawer hardware. Basic layout techniques will help get you started. Safety glasses, ear protection and suitable shoes are required.

16SCON103A \$485 3/3–6/9 DH-D/Carp
Th 6:30–9:30PM 36hrs, 12 sessions

Carpentry Skills - Basic

If you would like to do basic carpentry projects, this course will give you hands-on experience including using hand and power

tools, plus carpentry terminology. We encourage women and men carpentry enthusiasts to begin with this course. Safety glasses, ear protection and suitable shoes are required.

16SCON102A \$355 3/1–5/17 DH-D/Carp
Tu 6:30–9:30PM 30hrs, 10 sessions

Ceramic Tile Basics

Learn how to successfully tile your foyer floor, shower surround or kitchen backsplash area. Learn the correct substrates for wet or dry wall or floor installations. Cut and drill holes in all types of ceramic and porcelain tiles and become familiar with adhesives and grouts for different applications.

16SCON104A \$210 3/7–4/11 DH-D/Carp
M 6–9PM 15hrs, 5 sessions

of preparing the written report and the criteria to make or not make an additional verbal report to client, homeowner and occupants (exigency).

16SCON109A \$105 3/16 DH-C/27
W 6–9PM 3hrs, 1 session

Residential Building Foundations

Covers slab, crawl space, partial basement, full basement and combination crawl and full basement. Learn to evaluate the integrity of the foundation whether made of poured concrete, cinderblock, brick, natural stone, rubble, tree trunks, permanent wood foundation (PWF) or wood pier. Using photos from actual inspections, we will discuss the impact of stucco and other decorative cement coverings on foundations and foundation inadequacies such as unsupported brick facade, top below grade and voids. Look at more common issues of spalling, efflorescence, vertical cracks, horizontal cracks, “V” shaped cracks, concrete deterioration, bulging, vertical and horizontal displacement, uneven settlement and moisture intrusion.

16SCON108A \$105 3/30 DH-C/8
W 6–9PM 3hrs, 1 session

Roofs, Penetrations and Supports

The course will cover the different roof types and building materials seen on new and old homes. Discuss issues about re-shingling over an old layer and stripping a roof. Learn innovative methods for determining the

adequacy of a multiple layer roof and the importance of inspecting a roof from within an attic or attic crawl space. Learn how to evaluate penetrations including vent stacks, chimneys, skylights, service entry masts and power vents and how they impact the integrity of the roof. Join the debate on climbing up on the roof or staying on the ground and inspecting the roof with binoculars. Review contractual requirements and best safety practices.

16SCON112A \$105 4/6 DH-C/27
W 6–9PM 3hrs, 1 session

Water, Moisture, Humidity, Grading and Site Drainage

Presentations will include moisture and humidity penetration of a home, from mechanical failure of a roof or flashing to “sweating” pipes and leaky appliances. Learn how grading and site drainage are impacted by water issues in the neighborhood.

16SCON110A \$105 4/13 DH-C/27
W 6–10PM 4hrs, 1 session

Wood Frame Residential Decks & Common Causes of Deck Failure

Learn to do a thorough and professional job evaluating deck structures. Discuss the structural components of a deck, material compatibility and good construction practices. The higher decks are constructed, the more the home inspectors need to have the latest knowledge of proper deck construction and inspection techniques. Be sure you understand the range of materials, connectors and fasteners!

16SCON111A \$105 4/20 DH-C/27
W 6–9PM 3hrs, 1 session

Construction Estimating & Project Management

Acquire the necessary skills to begin working in this field as an estimator or project manager. Topics include: Critical Path Management (CPM), estimating database development, job costing principles and estimating standards. In addition, learn estimating practices relating to drainage, sanitary, cut and fill, sewer and site work. Prereq: Blueprint reading and a strong basic math background. Textbook additional (www.wilsontech.org/bookstore).

16SCON105A \$485 3/1–6/7 DH-C/27
Tu 6:30–9:30PM 36hrs, 12 sessions

Home Remodeling

Learn basic residential construction and remodeling with emphasis on wall construction, framing, and door and window installation, molding installations, sheetrocking and taping, metal framing, stairs, rafters, and roofing.

16SCON114A \$485 3/2–5/25 DH-D/Carp
W 6:30–10PM 42hrs, 12 sessions

OSHA 10 Hour Construction Safety Training

Learn OSHA construction standards to perform your daily job functions safely. Topics: introduction to OSHA, electrical safety, scaffold safety, fall protection, stairways and ladders, excavations, hand and power tools. Upon successful completion, students will receive U.S. Dept. of Labor wallet card. Textbook additional (www.wilsontech.org/bookstore)

16SCON115A \$165 6/7–6/28 DH-C/16
Tu 6–8:30PM 10hrs, 4 sessions

Woodworking-Intermediate **NEW**

Become more adept in woodworking by learning techniques that will allow you to build furniture and other projects. Choose to work on a team project or to create your own wood product starting with planning and designing the project, selecting appropriate materials, and then fabricating your design. Learn about the functionality of design as well as the importance of proportion and balance. Develop skills in solid wood preparation and joinery that will keep your project intact for many years. Safety glasses, ear protection, and suitable shoes are required. Prerequisite: Cabinetmaking I or knowledge of wood working fundamentals.

Th 6:30–10PM 42hrs, 12 sessions

Industrial Electricity

Start with a review of basic electricity, Ohm's Law, wiring materials, raceways & boxes, switchboards, panelboards, motors, generators, air conditioning & refrigeration, fire pumps, and move into single phase concepts and residential services, branch circuits and feeders, and calculations. Also covered are conductors and over current protection, wiring methods, transformers, special locations and three phase wiring systems. Knowledge of the National Electrical Code will be used in this course. Prerequisite: Electrical Installation I and II, or field experience. Textbook additional (www.wilsontech.org/bookstore).

16SELE105A \$615 3/1–5/24 DH-C/17
Tu 6–9PM 33hrs, 11 sessions

Motor Control - Programmable Logic Controllers (PLC) - Advanced

An advanced class for the experienced electrician who has knowledge of motor controls and Windows for PCs. Review relays, timers, counters, assembling a PLC with switches, relays and lights, use of the programming software on a PC and learning to program a PLC. Ideal training for traffic controllers or maintenance electricians. Prerequisite: Electric Motor Control or relevant trade experience.

16SELE106A \$805 3/1–6/7 DH-C/10
Tu 6:30–10PM 42hrs, 12 sessions

In Wilson Tech's electrical courses, you will learn both the electrical theory and proper installation techniques of switches, receptacles and lighting fixtures. Get the preparation you need for a job as an entry-level electrical helper and/or apprentice.

National Electric Code and Test Preparation

This course is a must for anyone who works in the electrical field and wants to prepare for the Electricians License Exam. Get up-to-date on the new requirements of the National Electric Code. Cover wiring methods, materials and calculations for residential, commercial, industrial, special occupancies and hazardous locations. Study the National Electrical Code including: electrical safety, fire prevention, and electrical codes. NOTE: Before taking the exam, students must have 7 years experience as an electrician. For information about the exam, call the Office of Consumer Affairs at 631-853-4600. Textbook additional (www.wilsontech.org/bookstore)

16SELE113A \$525 3/7–6/13 DH-C/26
M 6–9:30PM 42hrs, 12 sessions

Schematic Reading

If you are in the HVAC or Electrical field, this course will help you learn the difference between wiring and ladder diagrams and how to use both. Gain a better understanding of drawing line diagrams. Become proficient in reading and understanding the logic concepts

behind these drawings. Gain the knowledge for different testing and troubleshooting techniques for any motor or HVAC equipment. Valuable to take before Electrical Motor Control. Prerequisite: Electrical Installation I or Refrigeration/Air Conditioning Introduction. Textbook additional (www.wilsontech.org/bookstore).

Marine Technical Specialist

Learn the skills you need to work in the recreational boating industry as a qualified marine technician who can service boats, boat engines and related systems as well as boat yard operations. Wilson Tech's program addresses the rapid advances in marine propulsion technology that now demand a high level of competency and training. Those earning certificates from Wilson Tech will be well-prepared for employment opportunities in boat yards, marinas, and engine repair facilities. Class meets one night/week for theory and one night/week for laboratory work. No classes during school holidays.

The six modules in this course can be completed in nine months. Graduates can obtain valuable industry-recognized certificates that attest to their skills. The program will also help prepare you to take engine certification tests from Yamaha, Evinrude and/or Mercury. To enhance employment opportunities, successful graduates of the program will be well-positioned to seek additional certifications from the American Boat & Yacht Council or the National Marine Electronics Association. The instructor will provide information about the additional preparation required for these certifications.

A basic set of hand tools (likely found in most households) as well as multi-meter and basic diagnostic tools are the student's responsibility, approx. \$2,500 for those with no toolbox. Tools can be purchased as needed based on supply list per module at www.wilsontech/marine.

Make it Happen! Get the Skills You Need to be a Certified Personal Trainer

**Certificate
Program**

This course will help prepare you to take the Personal Trainer Certification exam from the International Sports Sciences Association (ISSA). Learn basic exercise science, nutrition, fitness assessment, exercise programming, instructional and spotting techniques. Study anatomy, kinesiology, injury prevention, supplementation and nutrition and all aspects of weight and strength training as you prepare for employment as a personal trainer in a gym or fitness center or as a consultant for your own business. You'll gain first hand experience in Tech's new fitness center where you'll learn to apply your coursework to sound health and fitness programming on state-of-the-art exercise equipment. Tuition includes certification exam administered by ISSA, CPR certification and textbook.

WELDING

Seating is Limited, Register Early!

Electrical Arc Welding I

Learn the practical application of weldments in various positions, theories of electricity, welding circuits, current controls, and types of electrodes. Students must provide gloves, goggles/helmet. Two textbooks additional (www.wilsontech.org/bookstore).

16SWEL101A \$925 3/7-6/13 DH-C/Weld
M 6:30-10PM 42hrs, 12 sessions

BOCES full-time courses lead to satisfying careers!

Aviation Maintenance Technology, Automotive Technology, Esthetics, Cosmetology, Diagnostic Medical Sonography, Medical Assisting, Practical Nursing, Surgical Technology, Nurse Assisting

- Nationally accredited programs
- Federal financial aid available to those who qualify
- Knowledgeable instructors with real world experience
- Small classes for personal attention
- State-of-the-art equipment
- Hands-on training for optimal learning

Located at the Northport campus.

Aviation Maintenance Technology located at Republic Airport Campus

Electrical Arc Welding II

A continuation of Electrical Arc Welding I. Students provide gloves, goggles/helmet and textbook (textbook from Electrical Arc Welding I) (wilsontech.org/bookstore). This class fills up quickly - register early to ensure a seat in this class.

16SWEL102A \$925 3/2-5/25 DH-C/Weld
W 6:30-10PM 42hrs, 12 sessions

Fabrication Techniques

Do you have a project you want to build or repair? Come learn basic blueprints, proper design and layout so you can fabricate such projects as a utility trailer, wood burning stove, or hydraulic wood-splitters. Gain basic knowledge of proper equipment including hydraulic punch press and shears, drill press, lathe, milling machine, and welding equipment such as MIG, TIG and oxy-fuel cutting. Prerequisite: general knowledge of welding and application of various hand tools, or Electrical Arc I. Students must provide basic hand tools and materials. Cost of materials varies based on project. Tool list will be distributed at first class session.

16SWEL103A \$925 3/7-6/13 DH-C/Weld
M 6:30-10PM 42hrs, 12 sessions

Heliarc (Tig) I

Learn theory and practical applications of heliarc welding and positions and properties of various metals. Students must provide gloves, goggles/helmet.

16SWEL104A \$925 3/3-6/9 DH-C/Weld
Th 6:30-10PM 42hrs, 12 sessions

Heliarc (Tig) II **NEW**

Continue where Tig I left off. Establish an electric arc and properly deposit tack welds using GTAW process. Demonstrate an ability to weld a root pass with the proper melt through on inside of pipe using GTAW process. Practice all of these methods on 2G, 5G, and 6G positions.

16SWEL109A \$925 3/2-5/25 DH-C/Weld
W 6:30-10PM 42hrs, 12 sessions

Oxyacetylene Welding

Develop skill and knowledge in using oxyacetylene welding and brazing equipment. The course covers butt and fillet welding cutting techniques, brazing, and related safety practice. Students must purchase their own materials and provide gloves, goggles/helmet. Approx. \$100.

16SWEL105A \$925 3/1-6/7 DH-C/Weld
Tu 6:30-10PM 42hrs, 12 sessions

In Tech's welding classes, you can prepare for nationally recognized welding certification exams or come and build a project of your own choosing.

Welding Certification Preparation

This class is for experienced welders only. Prepare for the ASME Section IX Qualification Standard 6G pipe, 3G vertical and 4G overhead. After an evaluation period, you will either practice for the examination or pursue a course of remediation as prescribed by the evaluator/instructor. Prerequisite: Arc Welding I & II or a minimum of 5 years welding experience. Registration for Certification exam is separate and must be done in person at the Registration office. Certification exams additional, approximately \$150-\$200 depending on exam.

16SWEL106A \$1,515 3/1-5/24 DH-C/Weld
Tu 6-10PM 44hrs, 11 sessions

Welding Exams **NEW**

Western Suffolk BOCES offers four ASME welding exams. Call to register separately for the specific exam. All exams are held Tu, 6-10PM, May 24 at DH-C/Weld

Plate Test

16SWEL107A 3G Verticle Up \$150
16SWEL107B 4G Overhead \$150

frequently asked questions

What if I do not have a high school diploma?

A high school diploma is not required for most of our evening classes. Western Suffolk BOCES also offers a variety of no-cost ways to complete your high school education. To work toward your high school diploma or your equivalency diploma (TASC), see pg 37 or call our Career Center at (631) 667-6000 x327.

How can I get to Wilson Tech?

Wilson Tech campuses are centrally located and easily accessible by major roadways or public transportation. Maps are on our web site, www.wilsontech.org/sites.

Public Transportation options to Wilson Tech/ Dix Hills campus on weekdays, 8AM–3PM:

1. **From S. Huntington & Dix Hills:** \$29 to Rt. 231 at Lake Ave. Connect with free BOCES shuttle.
2. **From Huntington/Huntington Sta.:** S1, H9A or H9B to Walt Whitman Mall. Connect with free BOCES shuttle.
3. **From Northport & Greenlawn:** H4S to Walt Whitman Mall. Connect with free BOCES shuttle.
4. **From Dix Hills & Wheatley Heights:** \$23 to Wyandanch train station. Connect with free BOCES shuttle.
5. **From Amityville, Copiague, & Lindenhurst:** \$33 to Wyandanch train station. Connect with free BOCES shuttle.

For more information about bus routes, times and shuttle locations, visit or call the Career Center at Wilson Tech, (631) 667-6000 x327.

Can I receive tax incentives for BOCES courses?

The Taxpayer Relief Act of 1997 created the Lifetime Learning Credit, which is a tax incentive to help you offset the cost of your continuing education course work. A family can claim on its tax return a credit equal to 20% of \$5,000 of educational expenses, so the maximum benefit is \$1,000 for each tax year. For further information, contact your tax advisor.

Smoking Policy

Smoking is **not** permitted anywhere on campus.

Are there any additional costs?

In some instances students are required to purchase textbooks, personal protective

equipment or personal tools. The course descriptions in this catalog will indicate any additional costs or requirements.

Will I receive a certificate?

Yes, you will! Certificates of completion are issued at the last class at no cost to all career & technical education students who have successfully completed a course. To be eligible for a certificate, you must attend 80% of the class sessions (unless otherwise stipulated) and complete all other course requirements with a grade of 80% or above. Some programs have course-specific attendance requirements.

How do I order a transcript?

There is a \$5 fee for duplicate copies of certificates and transcripts. To order, go to www.wilsontech.org/transcript.

Do Tech courses qualify for veteran's benefits?

Yes, veterans may qualify for complimentary GI Bill® training at Wilson Technological Center through the U.S. Department of Veteran Affairs. Contact your local Veterans' representative or call (631) 667-6000 x353 to speak with our veterans' advisor. More information about VA education benefits at www.benefits.va.gov/gibill

What if I have a special need?

Many of our programs are appropriate for adults with special needs. Contact the Career Center at (631) 667-6000, x152 prior to your first day of class so that our staff can make an effort to assist you with any necessary arrangements. All our facilities are wheelchair accessible.

Does Tech offer gift certificates?

We will gladly issue a gift certificate in any denomination to the person of your choice. To order, send a check or money order in the amount desired to: Office of Continuing Education, Western Suffolk BOCES, 17 Westminster Ave., Dix Hills, NY 11746

Western Suffolk BOCES policy

Parking

All vehicles MUST park in designated parking areas. NO cars may be parked in designated fire zones, reserved parking or on the grass

Damage to or Loss of Personal Property

Western Suffolk BOCES assumes no responsibility, either real or implied, for the personal property of any adult student. Students should review their own insurance coverage regarding personal property liability.

Refund Policy for Part-time Programs

1. If we cancel a course, all your fees are totally refunded.
2. If you cannot attend a class that has been rescheduled to a time or place other than advertised, you are entitled to a full refund.
3. If you withdraw from a class before the first scheduled class meeting, a full tuition refund, less a withdrawal fee of \$25, will be made after the withdrawal* is requested in writing.
4. If you withdraw after the first scheduled class meeting but before the second class meeting, one-half of the tuition, less a withdrawal fee of \$25, will be refunded after withdrawal* is requested in writing. NOTE: No refunds for any dance or fitness class after the first class begins.
5. All extra costs, such as books or equipment that were not included in tuition price, are not subject to refund.

6. We are unable to provide refunds for requests received after the second scheduled class meeting. Waivers may be granted only under extenuating circumstances which must be detailed in writing within five days of your last day of attendance. If a waiver is granted, it must be used within one calendar year. Decisions to grant waivers are the prerogative of the BOCES administrator whose decision is final.
7. Any overpayment accepted will be totally refunded.
8. There is a \$25 fee for ALL returned checks.
9. Payments made with a credit card will receive refund credit on their credit card, however, any refund made after 120 days will be issued by BOCES check regardless of how tuition was paid.

NOTE: Every effort is made to provide you a timely refund. Processing of refunds may take 45 days after your first scheduled day of class. Our programs are supported entirely by student tuitions. No discounts can be provided.

*The date of withdrawal is the date/time your request is received at BOCES.

Refund Policy for Full-time Programs

See the individual program handbooks.

Issues Under Dispute

BOCES has an appeal and grievance policy at www.wilsontech.org/dispute.

financial aid available to those who qualify, call (631) 261-3600, x214

Federal Financial Aid

Available to those who qualify in these programs:

Aviation Maintenance Technology
Automotive Technology
Esthetics
Cosmetology
Diagnostic Medical Sonography
Medical Assisting
Practical Nursing
Surgical Technology

Eligibility Requirements

To receive federal financial aid, you must:

- Be a US citizen or eligible non-citizen
- Be enrolled as a regular student in an eligible program (listed above) at BOCES
- Be a high school graduate, or have a recognized GED
- For grants, be a student who has not yet earned a bachelor's degree
- Not be in default on previous student loans

or owe a refund on previous grants

- Make satisfactory academic progress as defined by BOCES
- Be registered for Selective Service if male and 18 years or older

Determining Financial Need

Generally, financial aid is awarded on the basis of financial need. When submitting a Free Application for Federal Student Aid (FAFSA) at www.fafsa.ed.gov, you are asking the government to look at your income, dependents and assets and calculate how much you and your family can be expected to contribute towards education. Financial need is the cost of education less the amount you can contribute.

Other Financial Options.

More at www.wilsontech.org/financialhelp about Federal Pell Grants, Direct Loans, Plus Loans; monthly payment plans; and Workforce Investment Act.

6 easy ways to register!

Registration ends one week before your class begins. Register early, classes fill quickly! Classes are filled on a "first come, first served basis." As classes fill, every effort is made to schedule additional classes to serve your needs. Full tuition must be received before you can be enrolled in a class. BOCES reserves the right to change locations, times or dates where necessary, or to cancel classes. Make your check or money order payable to: Western Suffolk BOCES. Unless notified otherwise, you can safely assume your registration is confirmed.

Online - Easiest!

Follow the instructions at www.wilsontech.org/express Registration accepted via a secure server.

In-person registration

At Dix Hills campus only
