Find Your Tech Class—and Your Future Career!

Want to advance in your career with specialized training? Considering a new one? Looking to increase your income with specialized skills? Or, are you a lifelong learner who wants to explore something completely new?

This Fall's full-time offerings at Wilson Tech range from accredited programs in construction and automotive trades to diverse health care offerings such as Diagnostic Medical Sonography and Surgical Technology. Once completed, you will be eligible for certification in some cases and Tech's Placement Office will help match your skills to local job offerings. Financial aid is available for some full-time courses.

Our part-time classes include Recovery Coach and Commercial Cooking, with a host of choices in between. Our convenient scheduling helps you manage your existing job and family responsibilities while exploring new career options.

All our classes have one thing in common—instructors with real-world expertise. Their experience ensures what you learn in the classroom is what you'll use in the workplace or your personal life.

Wilson Tech has been helping adults meet career goals for more than 50 years. We'd like to help you achieve yours. Register today!

Sincerely,

Michael Flynn
Chief Operating Officer

4 easy ways to register!

Registration ends one week before your class begins. Register early, classes fill quickly! Classes are filled on a "first come, first served basis." As classes fill, every effort is made to schedule additional classes to serve your needs. Full tuition must be received before you can be enrolled in a class. BOCES reserves the right to change locations, times or dates where necessary, or to cancel classes. Make your check or money order payable to: Western Suffolk BOCES. Unless notified otherwise, you can safely assume your registration is confirmed.

Online - Easiest!

Follow the instructions at www.wilsontech.org/express
Registration accepted via a secure server.

By Phone:

(631) 667-6000 x320

With VISA, MasterCard or Discover Card.
Have all your information before calling.

In-person registration

At Dix Hills campus only
Check, exact cash, money order or credit card.

By Purchase Order

Organizations enrolling staff for training can be invoiced if a PO number is provided.

Accreditation: Western Suffolk BOCES is accredited by the Council on Occupational Education for Aviation Maintenance Technology, Automotive Technology, Esthetics, Cosmetology, Diagnostic Medical Sonography, Medical Assisting, Practical Nursing, Surgical Technology. Contact COE at: 7840 Roswell Rd. Suite 325, Atlanta, GA 30350; phone (770) 396-3898; fax (770) 396-3790; www.council.org

MISSION STATEMENT FOR ADULT EDUCATION: Western Suffolk BOCES provides career training and literacy programs to help adults meet their career goals by developing skills essential for gainful employment, job advancement and new career opportunities.

Wilson Technological Center is the career and technical education division of Western Suffolk BOCES.

expand your options with new skills!

most classes begin the week of Sept. 12

Diagnostic Medical Sonography, Practical Nursing and Surgical Technology

Prerequisites for Surgical Technology, Practical Nursing and Diagnostic Medical Sonography:

- High school diploma or equivalent plus satisfactory score on the Pre-Entrance Exam.
- Sonography students must also have college credits as specified below.

NOTE: Financial aid available to those who qualify.

Diagnostic Medical Sonography

Learn the fascinating field of sonography including OB/GYN, abdomen vascular, echo, and breast ultrasound. This 24-month program integrates basic sciences, medical sciences and instruction in Diagnostic Sonography with supervised clinical experience in hospitals and doctors' offices from Manhattan to Southampton.

Students gain valuable hands-on experience in several three-month clinical rotations. Successful completion of the program leads to a certificate that qualifies you to sit for any of the five registry examinations in Diagnostic Medical Sonography 60 days prior to graduation. Accredited by the Commission of Accreditation of Allied Health Education Programs (www.caahep.org; 1361 Park St., Clearwater, FL 33756; 727/210-2350) upon the recommendation of the Joint Review Committee on Education in Diagnostic Medical Sonography.

Prerequisites: high school diploma or equivalent; a minimum grade of C in college-level, credit-bearing courses in General Physics, Anatomy & Physiology I & II, Algebra, and English; and a satisfactory score on Pre-Entrance Exam. Graduates from other health programs are welcome to apply. Courses begin in July and have vacation during holiday periods.

Additional costs of approximately \$1,700 for textbooks and uniforms. Financial aid is available to those who qualify.

17ASON500A \$43,050 7/17–6/2018 NPT/202A
M-F 8AM–6PM 2800hrs, 517 sessions

Practical Nursing

Learn the skills and knowledge necessary to be a valuable member of today's health care team. The School of Practical Nursing, located at Tech's Northport campus, helps prepare you for licensing as a practical nurse. The program is approved by the NYS Education Department. The low ratio of students to faculty allows many opportunities for individualized instruction.

For those planning to pursue additional training, Tech is affiliated with registered nursing programs at Helene Fuld College of Nursing, Nassau Community College, Suffolk Community College, SUNY Farmingdale and Molloy College. Advanced placement is available in the Surgical Technology Program within one year of graduation.

Tuition includes stethoscope and surgical scissors. Additional costs for textbooks, uniforms, licensing fee, physical exam, liability insurance and CPR certification are required for entering program. Financial aid available to those who qualify. Prerequisites: high school diploma or equivalent plus satisfactory score on Pre-Entrance Exam. HEGIS code 5209.20

Evening

17APNU500B \$19,599 3/16–10/17 NPT/211
M-Th 5:30PM–10PM 1350hrs, 397 sessions

Day Program coming in Sept. 2017

For courses that begin after the Fall of 2016, please confirm tuition at www.wilsontech.org or by calling 631-667-6000, x320.

Surgical Technology

Learn to work closely with surgeons, anesthesiologists and registered nurses to provide patient care throughout surgery. Study setting up the operating room, prepping patients, the disease process and instrumentation. You will be assigned to a local health care facility to work under an experienced health care professional. This program helps prepare you for employment in operating rooms, surgical offices, delivery rooms, emergency departments, physician and dentist offices, central supply services, cardiac catheterization clinics, tissue banks and ambulatory surgical care sites. Advanced placement is available

in the Practical Nursing program within one year of graduation. Accredited by the Commission on Accreditation of Allied Health Education Programs (www.caahep.org; 1361 Park St., Clearwater, FL 33756; 727-210-2350) upon the recommendation of the Accreditation Review Council on Education in Surgical Technology and Surgical Assisting. Additional costs for textbooks, malpractice insurance, uniform, physical exam, and CPR certification are required for entering program. Financial aid available to those who qualify. Prerequisites: high school diploma or equivalent plus satisfactory score on Pre-Entrance Exam.

17ASGT500B \$17,850 4/24/17–4/30/18 NPT/204
M-F 9AM–2:30PM 1200hrs, 189 sessions

Prepare Now for the Pre-Entrance Exam!

All applicants to the Diagnostic Medical Sonography, Practical Nursing, and Surgical Technology programs must achieve a satisfactory score on the Pre-Entrance Exam (also known as Test for Academic Skills) and have a high school diploma or equivalent. These three programs have substantial class work and homework that require students to be proficient readers with a wide vocabulary and competent math problem solvers.

BOCES highly recommends that students take the Prep Class for Pre-Entrance Exams, however, those who have completed a recent academic program with strong grades may consider proceeding directly to the Pre-Entrance Exam. Most students find that the Prep Class for the Pre-Entrance Exam helps them prepare for the rigorous Pre-Entrance Exam, gain self-confidence, and solidify their interest in pursuing the academic work necessary to succeed in these programs.

Note: A successful score on the Pre-Entrance Exam is the first step in applying to these three programs but does not guarantee admission.

Prep Class for Pre-Entrance Exams:

Practical Nursing, Surgical Technology & Diagnostic Medical Sonography

BOCES statistics indicate that the passing rate on the Pre-Entrance Exam is higher for those who complete this Prep Class.

To enter these three programs, you must satisfactorily pass the Pre-Entrance Exam. Take this Prep Course to help you prepare for your Pre-Entrance Exam. Work on your reading comprehension, basic math skills, and critical thinking. Textbook additional (www.wilsontech.org/bookstore). Class meets 50 hrs, 10 sessions.

Course #17FPRE101A	T/Th 5–10 PM	\$399	Oct. 25–Dec 1	NPT, Room 209
---------------------------	---------------------	--------------	----------------------	----------------------

Pre-Entrance Exams (TEAS) May be taken once a semester. Exam fee is \$125.

The TEAS Pre-Entrance Exam is composed of the following areas: general math, science, reading comprehension, and English and language usage. If you have any questions about the Pre-Entrance Exam or you have a current IEP and are requesting testing modifications, call 631-261-3721.

While all prospective students take the same Pre-Entrance Exam, register with the course number of the program you hope to enter.

HEALTH

Central Sterile Processing Technician

Looking for a skilled, entry-level position in health care where you will have responsibility for a variety of vital services in health facilities? Apply now to become a certified Central Sterile Processing Technician who processes and sterilizes surgical instruments in hospitals, surgical centers and other health facilities. The course will help prepare entry-level technicians and refresh existing technicians who want to earn certification from the International Association of Healthcare Central Service Material Management (IAHCSCMM). Scientific principles of processing, sterilization, storage, distribution and inventory control of medical and surgical instruments and equipment for the operating room, emergency room and other areas of the hospital or healthcare facility will be stressed. This program will cover the primary responsibilities of the technicians and provide the knowledge necessary to be successful in this important field. Study anatomy and physiology, microbiology, infection control, disinfection and sterilization procedures, surgical instrumentation, and packaging and management of patient care supplies and equipment.

Coursework incorporates classroom and laboratory learning activities and resources and includes a 250-hour clinical internship within a local healthcare facility. Upon successful completion of the course, students will be eligible to take the IAHCSCMM certification exam for Certified Central Service Technician. Prereq: high school diploma or equivalent, personal interview, completed physical examination and successful score on TABE Survey test (see below). Additional costs: uniform approximately \$100, certification exam \$105. Textbook additional (www.wilsontech.org/bookstore).

17FMED112A \$6,500 9/13/16–5/18/17 NPT/202
Tu&Th 5–10PM 650hrs, 130 sessions

EKG/Monitor Technician

Satisfactory completion of this course will help prepare you to work as an entry level EKG or monitor technician in hospitals, clinics, health related facilities and physicians' offices. Learn to identify normal and pathologic heart rhythms

and collect diagnostic quality recordings of the heart's electrical and mechanical activity. You will also learn to monitor a patient's cardiac function in a critical care or emergency room setting. Gain the knowledge and skills to assist doctors and nurses by recognizing and reporting changes in a patient's heart function. The curriculum includes cardiac anatomy and physiology, 12 lead and rhythm strip analysis lead placement and 12 lead EKG. Rhythm strip practice will enhance learning and clinical skills. Don't miss the chance to be in the forefront of critical and emergency medicine! You must earn a final grade of 90% to receive a certificate of completion. Testing fee separate. High school diploma or equivalent is required to sit for the NCCT exam.

Textbook additional (www.wilsontech.org/bookstore). Students are required to purchase review books and practice exams available by contacting NCCT Customer Service at 1-800-875-4404 or www.ncctinc.com (Approx \$40). NCCT Test: January 11, 2017

17FMED105A \$865 9/14/16–1/4/17 DH-C/203
W 6–10PM 60hrs, 15 sessions

Infection Control/Preventing Disease Transmission

Based on the NYS Infection Control Training Syllabus. Learn how disease transmission occurs, how to prevent transmission, and what to do if an exposure occurs. This Infection Control training is valid for four years and required for NYS license renewal for RNs and LPNs. You will receive an official completion certificate.

Central Sterile Processing

TABE Test

Students MUST satisfactorily pass this Test of Adult Basic Education (TABE) before enrolling in any of the above programs. The test covers basic math computation and reading comprehension. The TABE test can only be taken once in a 6-month period.

All TABE tests are \$25, given at DH-A/Career Center. Call 631-667-6000, x327 to make an appointment to schedule your TABE test.

Medical Assisting

Prepare to work in physicians' offices, hospitals and clinics. Duties include running the front office, receptionist functions, bookkeeping, and filing. Assist the physician with examinations, treatments, and medications; perform EKGs and simple laboratory procedures. Study topics including hematology, urinalysis, phlebotomy, basic blood banking, and routinely performed chemistry tests. Clinical internship will be provided in local medical offices and clinics. Those who successfully complete this program are eligible to sit for two national certification exams: Medical Assisting and Phlebotomy. Testing fees separate. Prerequisites: basic computer skills and successful score on TABE Test. Additional costs (approx. \$550) for uniform, physical exam and textbooks (www.wilsontech.org/bookstore) Note: High school diploma or equivalent is required to sit for NCCT certification exams.

M-F 9AM–2PM 400hrs, 89 sessions

Medical Assisting/Clinical

Gain the skills necessary to work in a doctor's office or clinic. Class covers medical terminology, basic anatomy, sterilization techniques and vital signs. Learn how to properly prepare and assist with physical examinations and treatments including the basics of phlebotomy, EKG's, urinalysis, spirometry, prescription terminology, injection preparation, cultures and patient education. Textbook additional (www.wilsontech.org/bookstore). Prerequisite: Successful score on TABE test.

17FMED107A \$599 9/14/16–1/25/17 NPT/207
W 5:30–9:30PM 68hrs, 17 sessions

Musculoskeletal Ultrasound

This practical approach to musculoskeletal ultrasound imaging is taught by a physician or registered diagnostic medical sonographer. The 20 hour course will provide a comprehensive overview of the practical applications, techniques and interpretation of MSK imaging. Includes scanning experience in our laboratory utilizing state-of-the-art machines including Philips Epic 7. Prerequisite: Must be a registered Sonographer.

17FMED119A \$2,000 10/20–11/17 NPT/202A
Th 6–9PM 20hrs, 7 sessions

Nurse Assisting

Prepare to begin your nursing career as a nurse assistant. The program is approved by the NYS Education Department. Covers basic procedures in bedside nursing care, theory, medical ethics, and clinical supervision in a local health facility. Students who successfully complete this program will be eligible to take the Nurse Aide Evaluation Examination which qualifies students for a listing in the NYS registry. Requirements: a completed physical examination form by the first day of class, purchase of designated uniform, and fee of \$115 payable to the NYS Commissioner of Health for the state examination. Prerequisite: successful score on TABE. Call 631-667-6000, x327 for an appointment with a career counselor for assessment. Textbook additional (www.wilsontech.org/bookstore).

Build Your Foundation for a Career in Health Care

Anatomy and Physiology for Health Careers

The study of the human body and its systems is the first course in any health careers program. Careers in nursing, physical therapy, surgical technology, medical assisting, sports rehabilitation and personal training are a few careers that require a solid understanding of the human body. College-level Anatomy and Physiology encompasses such a vast body of knowledge that many students are overwhelmed and easily discouraged. This course offers an introduction to the human body, provides an understanding of body systems and lays the foundation for more detailed anatomy courses. This course is strongly recommended for anyone who is considering applying to a health career program. Textbook additional (www.wilsontech.org/bookstore).

17FMED114A \$299 2/6–3/15 NPT/202A M&W 6–10PM 40hrs, 10 sessions

Math for Health Careers

If you are considering any career in health care, this course is a must because strong math skills are essential for calculating medication dosages. Move from addition, subtraction, division, and multiplication to fractions, ratios, and proportions. Learn the systems used in measuring doses of medication and then learn to solve common dosage problems and complete temperature conversions. Practice using military time, a medical standard.

17FHEA108A \$129 1/19–2/9 NPT/215 Th 6–10PM 16hrs, 4 sessions

Physical Therapy Aide

Help patients recover from injuries, improve their mobility, resume work and enjoy life again. Gain the knowledge and skills to assist medical professionals and therapists in offices, clinics, hospitals, and long-term care facilities. Learn how to set up and maintain treatment areas, prepare equipment and assist patients in therapy. Topics include: customer service, workplace safety, common physical

disorders, physical therapy treatments and exercise, and mobility training and CPR. Field trips to local physical therapy office, held during the day, will highlight classroom theory and laboratory practice. Prereq: Successful score on TABE. Textbook additional (www.wilsontech.org/bookstore).

17FMED102A \$1,925 9/8–1/19 NPT/202
Tu&Th 6–10PM 132hrs, 33 sessions

Medical Office Coding & Billing Specialist

Certification

Learn to manage all aspects of the administration of a busy medical office and improve your job skills as a medical executive assistant. After successfully completing all seven modules, you are eligible to take the National Center for Competency Testing (NCCT) exam for certification as an Insurance and Coding Specialist. Prerequisite: High School Diploma or GED plus competence in keyboarding (see pg 17 for a listing of our basic computer courses) and a successful score on TABE test (pg 5). NOTE: Must complete Modules I-VII with a passing grade to sit for NCCT Certification exam, fee separate (\$90).

Tuition is for all seven modules. Complete the day program in 4 months or the evening program in 10 months. Additional costs for textbooks (www.wilsontech.org/bookstore) as well as review books and practice exams (NCCT Customer Service at 1-800-875-4404 or www.ncctinc.com) (Approx. \$90).

Module I: Medical Terminology I

Learn the meaning and pronunciation of commonly used medical terms and abbreviations. Building a strong medical vocabulary will enhance your success in the health field as well as increase your understanding of medical information. (40hrs)

Module II: Medical Terminology II

Learn the terminology associated with the structure and function of the skin, musculo-skeletal, cardiovascular, respiratory, digestive, endocrine, urinary, reproductive and nervous systems. Discuss common diseases, diagnostic procedures and laboratory testing. (40hrs)

Module III: Law and Ethics

Learn the professional responsibilities of members of the health care team and examine doctor-patient relationship. Discuss Patient Bill of Rights, HIPAA guidelines, licensing of health care providers, malpractice, health care proxy, consent policies and procedures, and legal responsibilities of the executive medical assistant. (20hrs)

Module IV: Administrative Office Procedures

Actual case scenarios will help you become well-versed in front desk reception, communication and listening skills, telephone techniques, medical records and appointment management. Covers patients' medical records, ledger cards, ICD and CPT coding, insurance claims and management of medical office's financial activity. (40 hrs)

Module V: Medical Coding

An introduction to basic guidelines in using the ICD-10 and CPT coding manuals. Learn methods specific for medical offices, and the billing of Medicare and private insurance. Explore appropriate use of modifiers. (80hrs)

Module VI: Electronic Medical/Health Records

Gain the skills needed to be a part of the U.S. healthcare system's transition to electronic medical records. In this course you will get practical experience to help you understand and become comfortable with computerized medical records used in the clinical setting. (40hrs)

Module VII: Electronic Billing

Learn to access information to complete and transmit insurance forms electronically. Learn to use ICD-10 and CPT Coding. You will receive individualized instruction to develop your billing skills in our computer laboratory. (50hrs)

Become a Recovery Coach

Certification

NOTE: These classes can be taken by CASAC (Credentialed Alcohol and Substance Abuse Counselor), CPS (Credentialed Prevention Specialist), & CPS (Credentialed Prevention Specialist) for re-credentialing and continuing education credits.

Prepare to work in the addiction and mental health field as a Recovery Coach who helps people along the path of recovery—either before, during, after or instead of treatment. Work in your own practice or in facilities such as community outreach centers, detox facilities, residential centers and hospitals. Recovery Coaches do not provide clinical help or dispense medication; instead they work with the recoveree, either as a solo coach or as part of a team. Learn to help patients engage with treatment and help them develop the various skills needed for recovery.

This class fulfills the 60 hour educational requirements set forth by NYS and the Office of Alcoholism and Substance Abuse Services (OASAS) to become a NY-certified Addiction Recovery Coach or NY-certified Addiction Recovery Advocate. Class includes extensive preparation for the certification exam. Instructor will provide information pertaining to exam testing locations and the application process. Class has four modules:

Module I-Recovery Coach Academy (30hrs) Module II-NYS Ethics (12hrs)
Module III-Medically Assisted Treatment (6hrs) Module IV-Spirituality (12hrs)

Upon successful completion of each module you will receive a Healthspan.US certificate as well as information to receive your CCAR (Connecticut Community for Addiction Recovery) Certificate which you will need to file your NYS application.

Curriculum includes the role of recovery coaches in the recovery process, core values and guiding principles of recovery, the many dimensions of recovery and recovery coaching, the stages of recovery, wellness planning, ethics and guidelines for making ethical decisions, as well as spirituality and what this means to each individual as it pertains to recovery. The course covers the history, concepts and varieties of Medically Assisted Treatment (MAT) that may be used during recovery pathways that include a medication component. No prerequisites.

Additional fees for:

- Manuals and materials (\$139 due on first night of class. Bring money order only made out to HealthSpan.US)
- Application fee for certification exam (\$100)
- NYS Recovery Coach Certification Exam (\$125 will be paid to NYS when application is submitted)

Wellness Recovery Action Plan (WRAP)

In 2010, WRAP was recognized by the United States Substance Abuse and Mental Health Services Administration (SAMHSA) as an evidence-based practice and listed in the National Registry of Evidence-Based Programs and Practices. It is used worldwide by people who are dealing with health and life challenges and by people who want to attain the highest possible level of Wellness. WRAP is for anyone, anytime. This program will prepare you with the tools necessary to be the best 'you' you can be. For professionals, WRAP offers proactive results from the very real effects of "Professional Burnout". This allows for renewed work enthusiasm, increased job performance and effective supports to the individuals you serve.

WRAP is a structured system you develop yourself and will complement the skills needed to pursue a wide array of careers in the medical field including: Recovery Coaches, Addiction Specialists, Mental Health Peer Specialists, Clinicians and Healthcare Providers.

WRAP further enhances the effectiveness of recovery groups, healthcare organizations, and healthcare systems that seek to support individuals' recovery and wellness.

WRAP can be adapted to: Work-related issues, self-management of addictions, becoming a non-smoker, mental health issues of depression/anxiety, for veterans and people in the military, for the effects of trauma, weight loss, Diabetes management and reducing clutter.

Wellness Recovery Action Plan (WRAP) Modules include:

- A Wellness Tool Box
- A Daily Maintenance Plan
- Triggers and an Action Plan
- Early Warning Signs and an Action Plan
- A Crisis Plan (Advance Directive)
- A Post Crisis Plan
- Recovery and Wellness Topics

After successful completion of this 8-week Training I Class, you will earn a WRAP Seminar I Completion Certification. This certificate will serve as the necessary pre-requisite coursework and help you earn the credentials necessary to become a Certified WRAP Facilitator through the Copeland Center for Wellness and Recovery. Should you choose this direction, your facilitator will provide all of the necessary information in class.

Additional fees: Manuals \$15 due on first night of class. Bring money order only made out to Pure Joy.

Laser Training For Licensed Estheticians

This hands-on program focuses on the use of medical lasers for the esthetician. This class is for licensed esthetician, RN, LPN, physician assistant, physician, certified electrologist, licensed massage therapist, or licensed acupuncturist. Review laser basics, theory and safety. Topics include: the capabilities of the esthetician in different venues such as physician's office or Medispa as well as clinical applications and practice methods regarding laser hair removal, skin rejuvenation, skin

tightening and treatment of pigmented skin lesions. Review clinical application of laser in conjunction with other esthetic techniques to maximize client satisfaction. Focus on prevention of complications and management of client expectations. Upon completion, you will be able to identify appropriate candidates for laser treatment, counsel the patient on anticipated response to treatment, and demonstrate familiarity with available technology. Taught by licensed estheticians.

Prepare for ASE Certification Automotive Technician Training

Certificate

Automotive Technician Training

Vehicles are far more sophisticated today than in previous decades and require technicians with more advanced technical training and computer skills. Wilson Tech, accredited by the National Automotive Technicians Education Foundation (NATEF), is equipped to teach you the skills that will help you advance in this field. Upon successful completion you will be prepared to sit for the corresponding certification exams which stress knowledge of job-related skills and lead to Automotive Service Excellence (ASE) certification.

Learn the theory and skills to diagnose, service and repair cars, SUVs and light duty trucks. You will use up-to-date electronic and hydraulic equipment to precisely diagnose today's sophisticated vehicle. Prerequisite: High school diploma or equivalent and satisfactory score on a TABE exam and interview. Students must also attend a 4-hour safety orientation workshop. Textbooks included. New students may begin on the first day of most modules.

Program approved by the Federal Aviation Administration

FAA Airframe & Powerplant Certificates

- Located at Republic Airport in Farmingdale
- Approved for ACCES-VR, VA
- FAA-certified instructors
- Financial aid/payment plans available to those who qualify
- DD214 Waivers are evaluated onsite for approved military training

Certificate Programs

Aviation Maintenance Technology

This FAA-approved program provides the hands-on experience to service, repair and overhaul reciprocating and turbine engines and components, powerplant control systems, instrumentation, and induction and exhaust systems.

To prepare for both the FAA Airframe and Powerplant licenses, students must complete five semesters (total of 1,910 hours). Call 631-752-1957 for more information and to tour the facility.

Semesters begin September, January and May, and the program is offered at our Aviation Facility at Republic Airport in Farmingdale. Financial aid/payment plans available to those who qualify. Call our Financial Aid office at 631-261-3600, x214. DD214 waivers are evaluated on-site for approved military training.

Tuition includes basic tools for each curriculum area, books, and testing for the Designated Mechanic Exam (DME). Students must supply coveralls with long sleeves and work boots to be worn in the hanger. FAA exams (3) extra: \$150 each. For those seeking just one of these FAA licenses, take General plus both sections for the license you seek. Tuition will be prorated accordingly. Before being admitted into the AMT program, prospective students must take the TABE Survey (Test of Adult Basic Education), receive a successful score and meet with administration to determine eligibility into the program.

Make Your Profile on Social Media Work for You and Your Business!

twitter LinkedIn facebook Instagram

Get practical, real-world insights into the power of social media. Come familiarize yourself with proven techniques and strategies.

Social Media for Business

Social media can drive meaningful revenue to your business whether you have a brick-and-mortar store or an e-commerce site. Learn how you can use Facebook, LinkedIn, and Instagram to grow your business by understanding how to optimize these social media platforms. Find out how social media tools can help you analyze the effectiveness of your strategies and bring you greater business success. We will help you get up-to-date on social media best practices and teach you how to evaluate the tools that social platforms offer so you can select the best fit for you or your business/organization. Classes are 3 hours, 1 session. **Business accounts must be created prior to attending all Social Media for Business classes below.**

Introductory Courses: Gain an overview of the specific platform and how to tailor that social media tool to your existing business strategies and how to use tools for monitoring trends. Learn from real case studies as you gain hands-on experience.

Facebook for Business	17FCOM116A	\$65	9/12	DH-C/224	M 7-10PM
Twitter/LinkedIn	17FCOM118A	\$65	9/26	DH-C/224	M 7-10PM
Instagram	17FCOM142A	\$65	10/24	DH-C/224	M 7-10PM

Intermediate Courses: Expand your digital footprint to make sure you're getting the most out of your choice of social media. Develop your social media presence into a powerful brand building tool and gain a more in-depth understanding of the fundamentals of social media analytics. Learn to identify which trends matter the most (and which ones to avoid), how you can use your data to optimize content, and different ways that you can organize and report your data to clients and marketing teams. Classes are 3 hours, 1 session.

Facebook for Business	17FCOM117A	\$65	9/19	DH-C/224	M 7-10PM
Twitter/LinkedIn	17FCOM119A	\$65	10/17	DH-C/224	M 7-10PM
Instagram	17FCOM143A	\$65	11/7	DH-C/224	M 7-10PM

Social Media for Personal Use

Create a profile on social media and learn how to connect with people you know as well as people you would like to know. Find out what's trending, what inspires you, what creative people are doing and what your favorite personalities, brands, or bloggers like. We will help you get up-to-date on social media, settings, privacy, and how to set up your personal page.

Introductory Courses: Gain an overview of the specific site and how to set it up for your personal use. Class is hands-on so come ready to set-up your account or work on your existing page. Classes are 3 hours, 1 session.

Facebook	17FCOM144A	\$65	9/14	DH-C/224	W 7-10PM	3hrs, 1 session

A+ Certification Prep Part 1: Hardware

This core course helps prepare you for the hardware aspects of CompTia's A+ exams. Prerequisites—Computer Electronics/

Develop workforce readiness skills and build a foundation for success in networking-related careers and degree programs. Learn skills to use immediately in your job and accelerate your ability to pursue advanced technology certifications.

Learn practical CCNA Routing and Switching networking concepts from network applications to protocols and services.

The new CCNA Routing and Switching (CCNA R&S) curriculum

is fully aligned with the new CCENT and CCNA R&S certification exams. Students will progress from basic networking to more complex enterprise and theoretical networking models.

Cisco Networking Fundamentals

For those with no computer or network knowledge. This course will help you gain the necessary understanding of networking technology for entering the Networking Academy. Students will learn such topics as: binary and hexadecimal number systems, number conversion, logic gates, Windows operating system, MS-DOS, computer hardware, networking concepts, networking architecture and topology, cabling, and circuit testing.

17FCIS108A \$409 9/13–10/27 DH-C/227

Tu&Th 6–9:30PM 42hrs, 12 sessions

Cisco Introduction to Networks– Module I

The CCNA Routing and Switching introductory courses introduce the architecture, structure, functions, components, and models of the internet and other computer networks. Build a solid foundation for additional training as you learn the principles and structure of IP addressing and the fundamentals of ethernet concepts, media and operations.

By the end of this course, students will be able to build simple LANs, perform basic configurations for routers and switches, and implement IP addressing schemes. Prerequisite: Basic understanding of computers.

17FCIS109A \$815 11/3–1/17 DH-C/227

Tu&Th 6–10PM 70hrs, 17 sessions

Cisco Connecting Networks– Module IV

This course discusses the WAN technologies and network services required by converged applications in a complex network. Gain an understanding of the selection criteria for network devices and WAN technologies to meet network requirements. Learn how to configure and troubleshoot network devices and resolve common issues with data link protocols. Develop the knowledge and skills needed to implement IPSec and virtual private network (VPN) operations.

17FCIS112A \$815 9/12–11/16 DH-C/227

Tu 6:30–10PM 42hrs, 12 sessions

Courses for Home Inspectors/Contractors/Homeowners

All courses are approved by the NYS Dept. of State.

Home Inspection License

Approved by the Nat'l. Assn. of Home Inspectors, Inc. and the Nat'l. Assn. of Certified Home Inspectors, this course meets the requirements of the NYS Home Inspection licensing law and helps prepare you for the certification exam. 100 hours of classroom study and 40 hours of in-field experience (approx. 10 home inspections on weekends) plus homework assignments and final exam. 100% attendance is mandatory by state law. A background in engineering, construction, or trades (electrical, heating and plumbing) is helpful but not mandatory. Tuition includes onsite inspection forms, and floor protectors (booties). Textbook additional (www.wilsontech.org/bookstore). Students will be asked to volunteer their homes for inspection. After completing course and passing the NYS exam, you must apply to the State with a nonrefundable \$250 fee. Prerequisite: High school diploma or equivalent, freedom from disqualifying criminal convictions.

17FCOM106A \$2,030 9/13–4/25 DH-C/8 Tu 6–10PM 140hrs, 25 classroom sessions

Continuing Education

Home Inspection–Building Science

Helpful for a homeowner or 'do-it-yourselfer'. Covers thermodynamics, heat transfer, moisture evaluation, indoor air quality issues, air and vapor barriers, proper construction methods, heat loss and energy saving measures. Learn the basis for the current Energy Star programs. Learn ways to insulate attics, exterior walls, basements and crawl spaces to prevent excessive heat loss and moisture. Learn about weather stripping windows and doors, lighting, and evaluating buildings for proper R-value and U-value using scientific testing methods. Discuss high efficiency heating and hot water systems as well as ventilation systems. Covers furnaces, boilers, as well as geo-thermal and other heating methods with an emphasis on saving energy for heating and cooling. Discuss cooling loads and how to inspect duct systems for air leakage.

17FCOM107A \$299 9/13–10/13 DH-C/11
Tu&Th 6–9PM 24hrs, 8 sessions

Lead Safety Course

This course provides contractors with the 8-hour education and certification necessary for compliance with the federal directive. Developed by the Environmental Protection Agency (EPA), in collaboration with the Department of Housing and Urban Development (HUD) for training renovation, repair and painting contractors how to work safely in housing with lead-based-paint. It complies with EPA's Renovation, Repair, and Painting (RRP) Rule, and HUD's Lead Safe Housing Rule. These .8 CEUs count as part of the biennial 24 CEU credit requirement for home inspectors. The eight modules include discussions and demonstrations on the threat of lead paint, current NYS and federal regulations, the containment of dust and personal safety precautions when working in a lead environment.

17FCOM113A \$265 2/7, 2/9 DH-C/27
Tu&Th 6–10PM 8hrs, 2 sessions

Cabinetmaking–Introduction

Learn the techniques necessary to build a kitchen for yourself. Cut materials and create joinery to assemble a standard base cabinet with door and drawer and a standard wall cabinet with door. See the difference between framed and frameless cabinet construction. Develop the skills to install hinges and drawer hardware. Basic layout techniques will help get you started. Safety glasses, ear protection and suitable shoes are required.

17FCO103A \$485 9/15–12/15 DH-D/Carp
Th 6:30–9:30PM 36hrs, 12 sessions

Carpentry Skills–Basic

If you would like to do basic carpentry projects, this course will give you hands-on experience including using hand and power tools, plus

carpentry terminology. We encourage women and men carpentry enthusiasts to begin with this course. Safety glasses, ear protection and suitable shoes are required.

17FCO102A \$359 9/13–12/13 DH-D/Carp
Tu 6:30–9:30PM 30hrs, 10 sessions

Ceramic Tile Basics

Learn how to successfully tile your foyer floor, shower surround or kitchen backsplash area. Learn the correct substrates for wet or dry wall or floor installations. Cut and drill holes in all types of ceramic and porcelain tiles and become familiar with adhesives and grouts for different applications.

17FCO104A \$215 9/12–10/24 DH-D/Carp
M 6–9PM 15hrs, 5 sessions

Personal Safety During Inspections

Raise your awareness level of hazards, hidden and in plain sight, during a typical inspection. Review electrical hazards such as the circuit breaker panel, exposed junction boxes and conductors, and wet environments. Identify potential hazards and address exposure and materials used to enhance personal safety during inspection of suspected noxious, flammable and carcinogenic gasses; lead in plumbing and house paint; asbestos, and mold. You will also learn the correct method of preparing the written report and the criteria to make or not make an additional verbal report to client, homeowner and occupants (exigency).

17FCO109A \$105 1/3 DH-C/11
Tu 6–9PM 3hrs, 1 session

Residential Building Foundations

Covers slab, crawl space, partial basement, full basement and combination crawl and full basement. Learn to evaluate the integrity of the foundation whether made of poured concrete, cinderblock, brick, natural stone, rubble, tree trunks, permanent wood foundation (PWF) or wood pier. Using photos from actual inspections, we will discuss the impact of stucco and other decorative cement coverings on foundations and foundation inadequacies such as unsupported brick facade, top below grade and voids. Look at more common issues of spalling, efflorescence, vertical cracks, horizontal cracks, “V” shaped cracks, concrete deterioration, bulging, vertical and horizontal displacement, uneven settlement and moisture intrusion.

17FCO108A \$105 1/10 DH-C/11
Tu 6–9PM 3hrs, 1 session

Roofs, Penetrations and Supports

The course will cover the different roof types and building materials seen on new and old homes. Discuss issues about re-shingling over an old layer and stripping a roof. Learn innovative methods for determining the adequacy of a multiple layer roof and the importance of inspecting a roof from within an attic or attic crawl space. Learn how to evaluate penetrations including vent stacks, chimneys, skylights, service entry masts and power vents and how they impact the integrity of the roof. Join the debate on climbing up on the roof or staying on the ground and inspecting the roof with binoculars. Review contractual requirements and best safety practices.

17FCO112A \$105 1/17 DH-C/27
Tu 6–9PM 3hrs, 1 session

Water, Moisture, Humidity, Grading and Site Drainage

Presentations will include moisture and humidity penetration of a home, from mechanical failure of a roof or flashing to “sweating” pipes and leaky appliances. Learn how grading and site drainage are impacted by water issues in the neighborhood.

17FCO110A \$105 1/24 DH-C/27
Tu 6–10PM 4hrs, 1 session

Wood Frame Residential Decks & Common Causes of Deck Failure

Learn to do a thorough and professional job evaluating deck structures. Discuss the structural components of a deck, material compatibility and good construction practices. The higher decks are constructed, the more the home inspectors need to have the latest knowledge of proper deck construction and inspection techniques. Be sure you understand the range of materials, connectors and fasteners!

17FCO111A \$105 1/31 DH-C/27
Tu 6–9PM 3hrs, 1 session

Construction Estimating & Project Management

Acquire the necessary skills to begin working in this field as an estimator or project manager. Topics include: Critical Path Management (CPM), estimating database development, job costing principles and estimating standards. In addition, learn estimating practices relating to drainage, sanitary, cut and fill, sewer and site work. Prereq: Blueprint reading and a strong basic math background. Textbook additional (www.wilsontech.org/bookstore).

17FCON105A \$485 9/13–1/3 DH-C/9
Tu 6:30–9:30PM 36hrs, 12 sessions

Home Remodeling

Learn basic residential construction and remodeling with emphasis on wall construction, framing, and door and window installation, molding installations, sheetrocking and taping, metal framing, stairs, rafters, and roofing.

17FCON114A \$489 9/14–12/14 DH-D/Carp
W 6:30–10PM 42hrs, 12 sessions

OSHA 10-Hour Construction Safety Training

Learn OSHA construction standards to perform your daily job functions safely. Topics: introduction to OSHA, electrical safety, scaffold safety, fall protection, stairways and ladders, excavations, hand and power tools. Upon successful completion, students will receive U.S. Dept. of Labor wallet card. Textbook additional (www.wilsontech.org/bookstore).

17FCON115A \$169 1/3–1/24 DH-C/16
Tu 6PM–8:30PM 10hrs, 4 sessions

Woodworking-Intermediate

Become more adept in woodworking by learning techniques that will allow you to build furniture and other projects. Choose to work on a team project or to create your own wood product starting with planning and designing the project, selecting appropriate materials, and then fabricating your design. Learn about the functionality of design as well as the importance of proportion and balance. Develop skills in solid wood preparation and joinery that will keep your project intact for many years. Safety glasses, ear protection, and suitable shoes are required. Prerequisite: Cabinetmaking I or knowledge of woodworking fundamentals.

DRAFTING/AUTOCAD

AutoCAD–Beginner

Hands-on introduction to 2D AutoCAD drawing as well as the 3D capabilities of the architectural desktop add-on. Learn the beginning skills and commands to use AutoCAD, the most popular desktop computer-aided drawing software. AutoCAD may be used in both manufacturing and architectural environments on a professional level. One student to a computer. Optional lab time will be available one hour before each class so students can complete 3D drawings for their class project.

17FCAD101A \$769 9/15–12/15 DH-C/18
Th 6:30–10PM 42hrs, 12 sessions

Intermediate AutoCAD and 3D Modeling **NEW**

A continuation of AutoCAD 1 with the addition of 3D modeling. Learn to create and use a template with customized settings and title blocks to produce complete drawings. You will also learn to create 3D models of your drawings. The ability to use the AutoCAD commands introduced in AutoCAD 1 is required to succeed in this class.

17FCAD103A \$769 9/13–1/3 DH-C/18
Tu 6:30–10PM 42hrs, 12 sessions

ELECTRICAL

Electrical Installation I

Learn basic electrical theory, use of hand tools, materials, proper installation of switches, receptacles and lighting fixtures, special purpose receptacles and applications in order to apply for a job as an entry level electrical helper and/or apprentice. This course is structured as a combination lecture/shop class. Most classes will consist of a 30-40 minute lesson followed by hands-on shop work where you will practice the skills and theories taught. Students must purchase hand tools from a list provided by the instructor on the first night of class, approx. \$100. Textbook additional www.wilsontech.org/bookstore.

17FELE112A \$815 9/12–1/23 DH-D/Elec
M 6:30–10PM 52hrs, 15 sessions17FELE112B \$815 9/14–1/11 DH-D/Elec
W 6:30–10PM 52hrs, 15 sessions

Electrical Installation II

A continuation of Electrical Installation I with emphasis on commercial and industrial systems and problems. Students may purchase additional hand tools from a list provided by the instructor the first night of class (approx. \$50). Prerequisite: Electrical Installation I. Textbook additional (www.wilsontech.org/bookstore).

17FELE103A \$675 9/13–1/3 DH-D/Elec
 Tu 6:30–10PM 42hrs, 12 sessions

Electrical Motor Control

Theory and practical application; wiring diagrams for a wide variety of motor installations and controls. Two textbooks additional (www.wilsontech.org/bookstore).

17FELE104A \$495 9/15–12/15 DH-D/Elec
 Th 6:30–10PM 42hrs, 12 sessions

Industrial Electricity

Start with a review of basic electricity, Ohm's Law, wiring materials, raceways & boxes, switchboards, panelboards, motors, generators, air conditioning & refrigeration, fire pumps, and move into single phase concepts and residential services, branch circuits and feeders, and calculations. Also covered are conductors and over current protection, wiring methods, transformers, special locations and three phase wiring systems. Knowledge of the National Electrical Code will be used in this course. Prerequisite: Electrical Installation I and II, or field experience. Textbook additional (www.wilsontech.org/bookstore).

17FELE105A \$619 9/13–12/20 DH-C/17
 Tu 6–9PM 33hrs, 11 sessions

Motor Control–Programmable Logic Controllers (PLC)–Advanced

An advanced class for the experienced electrician who has knowledge of motor controls and Windows for PCs. Review relays, timers, counters, assembling a PLC with switches, relays and lights, use of the programming software on a PC and learning to program a PLC. Ideal training for traffic controllers or maintenance electricians. Prerequisite: Electric Motor Control or relevant trade experience.

17FELE106A \$815 9/13–1/3 DH-C/10
 Tu 6:30–10PM 42hrs, 12 sessions

National Electric Code and Test Preparation

This course is a must for anyone who works in the electrical field and wants to prepare for the Electricians License Exam. Get up-to-date on the new requirements of the National Electric Code. Cover wiring methods, materials and calculations for residential, commercial, industrial, special occupancies and hazardous locations. Study the National Electric Code including: electrical safety, fire prevention, and electrical codes. NOTE: Before taking the exam, students must have 7 years experience as an electrician. For information about the exam, call the Office of Consumer Affairs at 631-853-4600. Textbook additional (www.wilsontech.org/bookstore).

17FELE113A \$529 9/12–12/12 DH-C/26
 M 6–9:30PM 42hrs, 12 sessions

Schematic Reading

If you are in the HVAC or electrical field, this course will help you learn the difference between wiring and ladder diagrams and how to use both. Gain a better understanding of drawing line diagrams. Become proficient in reading and understanding the logic concepts behind these drawings. Gain the knowledge for different testing and troubleshooting techniques for any motor or HVAC equipment. Valuable to take before Electrical Motor Control. Prerequisite: Electrical Installation I or Refrigeration/Air Conditioning Introduction. Textbook additional (www.wilsontech.org/bookstore).

Marine Technical Specialist

Learn the skills you need to work in the recreational boating industry as a qualified marine technician who can service boats, boat engines and related systems as well as boat yard operations. Wilson Tech's program addresses the rapid advances in marine propulsion technology that now demand a high level of competency and training. Those earning certificates from Wilson Tech will be well-prepared for employment opportunities in boat yards, marinas, and engine repair facilities. Class meets one night/week for theory and one night/week for laboratory work. No classes during school holidays.

The six modules in this course can be completed in nine months. Graduates can obtain valuable industry-recognized certificates that attest to their skills. The program will also help prepare you to take engine certification tests from Yamaha, Evinrude and/or Mercury. To enhance employment opportunities, successful graduates of the program will be well positioned to seek additional certifications from the American Boat & Yacht Council or the National Marine Electronics Association. The instructor will provide information about the additional preparation required for these certifications.

A basic set of hand tools (likely found in most households) as well as multi-meter and basic diagnostic tools are the student's responsibility, approx. \$2,500 for those with no toolbox. Tools can be purchased as needed based on supply list per module at www.wilsontech/marine.

Marine Technical Specialist

17FMTS200A \$2,339 9/13-6/13/17 HN/Rm 115 Tu&Th 6-9:30PM 231hrs, 66 sessions

Basic Marina Operations-Module I

You'll be taught the proper blocking, storing and trailing of boats. Students will practice with powered industrial trucks at a local marina to learn how to move pallets using a forklift, to pick up boats with a boat handling forklift and to prepare to move very large boats with a travel or strap lift. Students who successfully complete this module will earn their Apprentice Boat Bottom Painting and Powered Industrial Truck certificates as well as OSHA Powered Truck Safety certification, all in-demand credentials for employment in the marine industry. Learn excellent customer service skills and how to be a service writer as you gain an overview of the marina as a business. (21hrs)

Engine Technology-Module II

This module covers the theory of two and four-stroke internal combustion engines for both outboard and inboard engines with modern computer engine controls. Cooling systems and variable valve timing systems will also be covered. (42hrs)

Marine Wiring & Installations-Module III

Learn DC theory, wiring practices, and battery systems. Emphasis is on troubleshooting basic DC circuits. Learn

to use ABYC (American Boat and Yacht Council) and NMEA (National Marine Electronic Association) standards. Gain an understanding of proper installation of electronics for navigation and communication systems. (42hrs)

Fuel and Ignition Systems-Module IV

Learn carburetor theory, fuel and fuel delivery technology, fuel pumps, lubrication, boat fuel systems, safety standards and recommended practices. Gain in-depth information on how modern ignitions systems work. Learn current electronic ignition theory and troubleshooting using state-of-the-art test equipment. (42hrs)

Electronic Fuel Injection-Module V

Gain a thorough understanding of computerized electronic and direct injection engine operating systems. Heavy emphasis will be placed on hands-on computer diagnostics. (42hrs)

Drive Systems-Module VI

Study all drive systems in the industry today. This module covers outboard lower units, stern drive, and inboard transmissions diagnosis and rebuilding including shimmying procedures. (42hrs)

Boatyard Operations/Internship

Internships may be available for eligible students.

PHOTOGRAPHY

Beyond Photoshop: The Nik Collection by Google **NEW**

Photoshop does many things, but not everything, and some of what it does can be done better and more easily in other programs. The Nik Software Collection by Google is a FREE suite of seven powerful applications, most of which can be used with or without Photoshop. Learn how these programs add stunning color and saturation, reduce digital noise, sharpen more effectively, add analog film effects, and produce the very best in HDR and black & white image conversions offering precise control without using complicated masks and selections.

17FMGA149A \$55 11/30–12/7 DH-C/17
W 6:30–9PM 5hrs, 2 sessions

Exploring Photoshop Elements

Elements is the most extensive digital image management program available to accommodate the needs of novice and advanced photo enthusiasts alike. This consumer-friendly interface, coupled with its modest price, allows access to much of the same image processing power as Photoshop. Import, organize and manage your images for easy retrieval; learn to adjust color, fine tune exposure, retouch imperfections and combine part of one photo with another. Master the use of selections, levels, layers, layer masks and styles. Understand the RAW format. Use automated tools to create stunning panoramic and high dynamic range images. Bring your laptop if desired. Demonstration images will be provided.

17FMGA144A \$125 9/21–10/5 DH-C/17
W 6:30–9:30PM 9hrs, 3 sessions

Deciphering the DSLR

Modern DSLR cameras are packed with features and controls that can help you produce better pictures. Come learn how to use picture styles, scene modes, exposure compensation, the histogram display, and depth of field to get the very best results!

17FMGA130A \$29 9/12 DH-C/17
M 6:30–9:30PM 3hrs, 1 session

Make Photographs, Not Snapshots

For photographs that tell a story, provoke the viewer, or reflect your unique point of view, come learn the technical and creative variables of composition, lighting, lens choice, focus point and blur, and shooting mode that will take your images beyond those AUTO snapshots.

17FMGA142A \$29 10/17 DH-C/17
M 6–9PM 3hrs, 1 session

Making Prints That Match

You work hard to make your images look just the way you like them on screen. Then you click PRINT and the result is something completely different. Learn how to set up a color managed system so that your computer and your printer speak the same color language. Save time, avoid wasted ink and paper and eliminate all that frustration. What you see CAN be what you get, but only if you understand the concepts and techniques explained in this course.

17FMGA137A \$29 11/21 DH-C/17
M 6:30–9:30PM 3hrs, 1 session

Photoshop Essentials: Layers, Levels & Selections

Photoshop, like a tripod, rests on these three legs. Understanding layers, levels and selections is essential for meaningful use of the world's best known image editing software. Get a practical, easy-to-understand demonstration so you can use these features effectively. For all versions of Photoshop including Elements.

frequently asked questions

What if I do not have a high school diploma?

A high school diploma is not required for most of our evening classes. Western Suffolk BOCES also offers a variety of no-cost ways to complete your high school education. To work toward your high school diploma or your equivalency diploma (TASC), see pg 37 or call our Career Center at 631-667-6000, x327.

How can I get to Wilson Tech?

Wilson Tech campuses are centrally located and easily accessible by major roadways or public transportation. Maps are on our website, www.wilsontech.org/sites.

Public transportation options to Wilson Tech/Dix Hills campus on weekdays, 8AM–3PM:

- **From S. Huntington & Dix Hills:** \$29 to Rt. 231 at Lake Ave. Connect with free BOCES shuttle.
- **From Huntington/Huntington Sta.:** S1, H9A or H9B to Walt Whitman Mall. Connect with free BOCES shuttle.
- **From Northport & Greenlawn:** H4S to Walt Whitman Mall. Connect with free BOCES shuttle.
- **From Dix Hills & Wheatley Heights:** \$23 to Wyandanch train station. Connect with free BOCES shuttle.
- **From Amityville, Copiague, & Lindenhurst:** \$33 to Wyandanch train station. Connect with free BOCES shuttle.

For more information about bus routes, times and shuttle locations, visit or call the Career Center at Wilson Tech, 631-667-6000, x327.

Can I receive tax incentives for BOCES courses?

The Taxpayer Relief Act of 1997 created the Lifetime Learning Credit, which is a tax incentive to help you offset the cost of your continuing education course work. A family can claim on their tax return a credit equal to 20% of \$5,000 of educational expenses, so the maximum benefit is \$1,000 for each tax year. For further information, contact your tax advisor.

Smoking Policy

Smoking is not permitted anywhere on campus.

Are there any additional costs?

In some instances students are required to purchase textbooks, personal protective equipment or personal tools. The course

descriptions in this catalog will indicate any additional costs or requirements.

Will I receive a certificate?

Yes, you will! Certificates of completion are issued at the last class at no cost to all career & technical education students who have successfully completed a course. To be eligible for a certificate, you must attend 80% of the class sessions (unless otherwise stipulated) and complete all other course requirements with a grade of 80% or above. Some programs have course-specific attendance requirements.

How do I order a transcript?

There is a \$5 fee for duplicate copies of certificates and transcripts. To order, go to www.wilsontech.org/transcript.

Do Tech courses qualify for veteran's benefits?

Yes, veterans may qualify for complimentary GI Bill® training at Wilson Technological Center through the U.S. Department of Veteran Affairs. For part-time programs contact your local Veterans' representative or call 631-667-6000, x353 to speak with our veterans' advisor. For full-time programs call 631-261-3600, x275. More information about VA education benefits at www.benefits.va.gov/gibill

What if I have a special need?

Many of our programs are appropriate for adults with special needs. Contact the Career Center at 631-667-6000, x152 prior to your first day of class so that our staff can make an effort to assist you with any necessary arrangements. All our facilities are wheelchair accessible.

Does Tech offer gift certificates?

We will gladly issue a gift certificate in any denomination to the person of your choice. To order, send a check or money order in the amount desired to: Office of Continuing Education, Western Suffolk BOCES, 17 Westminster Ave., Dix Hills, NY 11746

<p>Wilson Technological Center Adult Career & Technical Education 17 Westminster Ave. Dix Hills, NY 11746 Date Issued: _____</p>	<h2>Gift Certificate</h2> <p>To: _____</p> <p>For: _____</p> <p> Wilson Technological Center is the career and technical education program of Western Suffolk BOCES.</p> <p>_____ Supervisor, Adult Career & Technical Education</p>
---	---

Give the gift of learning. Call 631-667-6000, x320.

Western Suffolk BOCES policy

Parking

All vehicles **MUST** park in designated parking areas. NO cars may be parked in designated fire zones, reserved parking or on the grass.

Damage to or Loss of Personal Property

Western Suffolk BOCES assumes no responsibility, either real or implied, for the personal property of any adult student. Students should review their own insurance coverage regarding personal property liability.

Refund Policy for Part-time Programs

1. If we cancel a course, all your fees are totally refunded.
2. If you cannot attend a class that has been rescheduled to a time or place other than advertised, you are entitled to a full refund.
3. If you withdraw from a class before the first scheduled class meeting, a full tuition refund, less a withdrawal fee of \$25, will be made after the withdrawal* is requested in writing.
4. If you withdraw after the first scheduled class meeting but before the second class meeting, one-half of the tuition, less a withdrawal fee of \$25, will be refunded after withdrawal* is requested in writing. NOTE: No refunds for any dance or fitness class after the first class begins.
5. All extra costs, such as books or equipment that were not included in tuition price, are not subject to refund.

6. We are unable to provide refunds for requests received after the second scheduled class meeting. Waivers may be granted only under extenuating circumstances which must be detailed in writing within five days of your last day of attendance. If a waiver is granted, it must be used within one calendar year. Decisions to grant waivers are the prerogative of the BOCES administrator whose decision is final.
7. Any overpayment accepted will be totally refunded.
8. There is a \$25 fee for ALL returned checks.
9. Payments made with a credit card will receive refund credit on their credit card, however, any refund made after 120 days will be issued by BOCES check regardless of how tuition was paid.

NOTE: Every effort is made to provide you a timely refund. Processing of refunds may take 45 days after your first scheduled day of class. Our programs are supported entirely by student tuitions. No discounts can be provided.

*The date of withdrawal is the date/time your request is received at BOCES.

Refund Policy for Full-time Programs

See the individual program handbooks.

Issues Under Dispute

BOCES has an appeal and grievance policy at www.wilsontech.org/dispute.

financial aid available to those who qualify, call 631-261-3600, x214

Federal Financial Aid

Available to those who qualify in these programs:

Aviation Maintenance Technology
Automotive Technology
Esthetics
Cosmetology
Diagnostic Medical Sonography
Practical Nursing
Surgical Technology

Eligibility Requirements

To receive federal financial aid, you must:

- Be a US citizen or eligible non-citizen
- Be enrolled as a regular student in an eligible program (listed above) at BOCES
- Be a high school graduate, or have a recognized GED/TASC
- For grants, be a student who has not yet earned a bachelor's degree
- Not be in default on previous student loans or owe a refund on previous grants

- Make satisfactory academic progress as defined by BOCES
- Be registered for Selective Service if male and 18 years or older

Determining Financial Need

Generally, financial aid is awarded on the basis of financial need. When submitting a Free Application for Federal Student Aid (FAFSA) at www.fafsa.ed.gov, you are asking the government to look at your income, dependents and assets and calculate how much you and your family can be expected to contribute towards education. Financial need is the cost of education less the amount you can contribute.

Other Financial Options.

More at www.wilsontech.org/financialhelp about Federal Pell Grants, Direct Loans, Plus Loans, monthly payment plans, and Workforce Investment Act. **Western Suffolk BOCES School Code: 010147.**

most classes begin the week of Sept. 12

Adult full-time classes have different start dates. Check with your specific program.

BOOKSTORE:

Buy Textbooks Online

Textbooks or E-textbooks are needed for your first class! Find the name of the Tech class you are taking at www.wilsontech.org/bookstore. Then follow the link to take advantage of discounted textbooks. All workbooks must be purchased as new.

NOTE: Refund policies and shipping times are determined by each vendor and will vary. Neither Wilson Technological Center nor Western Suffolk BOCES assumes responsibility, either real or implied, for your transaction. In the event a class is canceled for any reason, students are responsible for textbook returns and any refunds available to them. If you have any questions about the textbook for your class, call 631-667-6000, x320.

Textbooks/workbooks purchased directly from Western Suffolk BOCES cannot be returned and refunds will not be given.

Western Suffolk BOCES Non-Discrimination Notice

The Board of Cooperative Educational Services of Western Suffolk County, New York does not discriminate on the basis of age, religion, creed, ethnic origin, national origin, marital status, race, color, gender, sexual orientation, veteran status, weight, disability or handicap in the educational programs or activities it operates and provides equal access to the Boy Scouts and other designated youth groups. This policy of non-discrimination includes the recruitment, hiring and advancement of employees; salaries, pay and other benefits; counseling services to students; student access to course offerings; lawful political activities; educational programs and other activities; and the business activities of the Board. Inquiries concerning the application of regulations prohibiting discrimination may be referred to the BOCES Compliance Officer, Paula Klingelhofer, who may be contacted at 507 Deer Park Road; PO Box 8007; Huntington Station, NY 11746-9007 or 631-549-4900, x204 or email pklingel@wsboces.org. Or, inquiries may be made by contacting the Office for Civil Rights at NY Office for Civil Rights, U.S. Department of Education, 32 Old Slip, 26th Floor, New York, NY 10005-2500 or call 646-428-3900, or fax 646-428-3843, or TDD 800-877-8339, or email OCR.NewYork@ed.gov or file form at <http://www2.ed.gov/about/offices/list/ocr/complaintintro.html>

BOCES full-time courses lead to satisfying careers!

Land the job you really want in a full-time program at BOCES. Classes are offered at either Wilson Tech's Northport or Republic Airport campus.
